Lahore, Pakistan

Profile

I am a Fresh React-Native App Developer with a passion for mobile application development. I have experience developing and testing applications for both Android and iOS platforms through React-Native. My experience includes using Java, Python, C, and C++. My goal is to create user-friendly, reliable apps that meet the client's needs and exceed their expectations. In addition to my programming skills, I am also proficient in Data Structures and Algorithms and have a strong understanding of the user experience. I am confident I can bring innovative solutions to any mobile application project.
